

ProSeries® Tape

ProTape®

This tape is made of Bi-Oriented Polypropylene (BOPP) film coated with water base acrylic adhesive. Being pressure sensitive this tape does not need solvents, heat, or water for activation.

ProTape® Features

- ◆ Resistance to UV, moisture, cold and weathering.
- ◆ Good initial tack, long term adhesion.
- ◆ Performs under wide temperature range.
- ◆ Clarity: tape stays clear and won't yellow.
- ◆ Good strength and impact resistance.
- ◆ Maintains adhesion in temperatures ranging from -10° to 200°

Dispenser not included with case of tape
